

# FLEXACT AND COMPACTIBLE

Version 03/11

## METAL SEPARATOR QUICKTRON 05 A TOUCH

**FOR THE EXAMINATION OF BULK MATERIALS IN FREE FALL**

- Detects and separates **all metals** in solid products or as loose parts
- Extremely precise metal detection - impressively reliable
- Durable and solid - a profitable investment
- ATEX conforming versions available 
- Compact, easily integrated

**MESUTRONIC**  
*Metal Detection made in Germany*

# QUICKTRON 05 A TOUCH

Metal Detection made in Germany means:

- Ease of integration in the production line - compact build, moveable reject mechanism, integrated or separate electronics.
- Reliable protection. Only authorized operators that know the 4 digit code can access the 3 operating levels of the metal detector. Chosen functions can be rendered freely accessible for any user by the administrator.
- The continuously operating self-monitoring system offers the highest degree of safety. It records fifty-eight (58) different device capabilities and reports any system failure reliably. Meaningful text messages are helpful and save valuable time.
- Always informed. Up to 125 devices can be centrally managed and controlled through a bus line (CAN-bus or Ethernet). We are always there when you need us with **mesuREMOTE**, the remote control module from MESUTRONIC.
- For all applications and every amount of material the appropriate metal separator. Several aperture sizes are available, for example round (Stand version 50-300 mm) square or rectangular. If the installation site is not accessible, opt for the version with a separate electronics cabinet.
- Minimal loss of good material due to the rapid reacting reject system.
- Durable and powerful, air operated, maintenance-free reject technology. Tested for more than 100,000 movements.

Detailed information can be found in our technical data sheet.

## Quick-Out-Eject-Gate

(optional at model 80 - 200)

The eject gate can be removed and separated from the rest of the unit for cleaning in a few simple steps.

## Proven safety

MESUTRONIC metal separators series QUICKTRON 05A are available in ATEX version for hazardous environments. Proven and tested by an accredited independent certification company. Safety without compromise.
